

TACK ROOM EQUIPMENT

Saddle Trolley

Multifunctional – our Saddle Trolley

This saddle trolley is manufactured of birch plywood, European oak or mahogany and is a tool/tack box as well as a station to polish your saddle due to the swivel top and as saddle trolley. You can not only easily roll your valuable equipment from A to B but the saddle trolley looks also absolutely fantastic due to the high-end design and finishing. The optional swiveling top is as we think one of the highlights of this product. Due to this feature your saddle trolley enables you to clean your tack and saddles comfortably.

The saddle trolley is available in 4 standard versions with a length of either 80cm or 100cm:

- Without draw / without swivel system
- Without draw / with swivel system
- With draw / without swivel system
- With draw / with swivel system

Saddle trolleys with a length of 100cm have 2 draws of 50cm.

Individual draws and dimensions on request
