

# ARENA FOOTING MAINTENANCE

## Track Plough

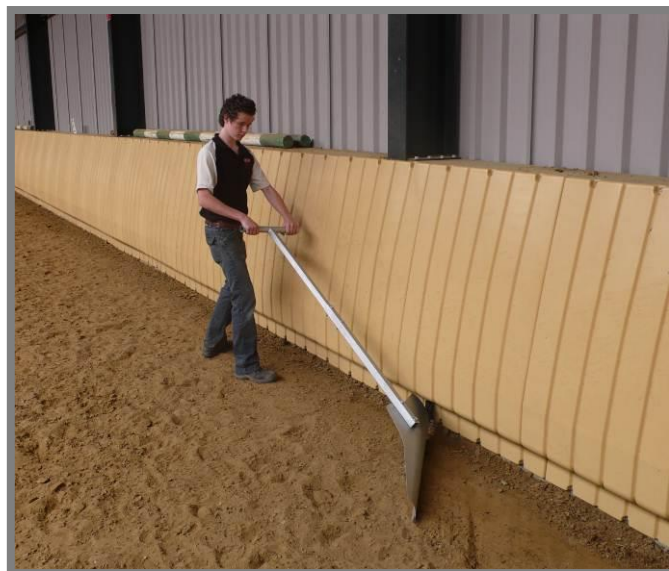

We have revised the proven track plough. Due to a recess on the side of the track plough it is not only suitable for all tracks but also adapts perfectly to our "Safety Wall".

With our track plough you can level the tracks in your indoor arena without great effort in one simple operation. Rakes and shovels are therefore things of the past.

The COLUMBUS track plough – try it out!

You will get the track plough for a test period of 14 days. If you are not convinced after these 14 days you can send it back and we will give you your money back as well. However, we are pretty sure that you do not want to miss the COLUMBUS track plough any more.

- Ideal to quickly level the tracks without great effort
- Obstacles do not need to be moved away anymore
- Quick and easy
- Suitable for all arena footings
- Pulling weight can be regulated by adjusting the angles of the blade
- Can be disassembled for transportation
- Special protection rubber on the sides (optional)

**And what about the rest of the arena footing?**

**No problem – we also offer some other arena levellers.**

**Don't hesitate to ask!**
