

# ARENA FOOTING MAINTENANCE

Riding arena leveller

## Adaptable solutions for an efficient arena maintenance

Columbus offers the right maintenance machines for each type of arena surface. With our tools you can carry out the daily maintenance efficiently and quick. Every arena footing is only as good as the maintenance of it.

The riding arena levellers have been developed specifically for the maintenance of uneven and hardened arena surfaces with sand and sand with textile additives. Their construction is very robust and handling is very simple.

## Loosening, mixing and compressing all in one work step!
